

# DPB-500K纸塑包装机

DPB500K Automatic blister card packing machine

## 产品介绍:

DPB-500K采用变频调速与机、电、光、气，一体化自动控制技术，具有行程可调，工位结构模块化，且操作简单、产量高、废料少、无污染、低噪音，且外观精美，是适合许多产品的自动化包装设备。

本机的主要装置有PVC加热、成型、成型泡罩检测（选配）、加料、缺料检测剔除（选配）、行程牵引、冲裁、分托过渡、纸塑热封等工位。

DPB500K Automatic blister card packing machine adopt frequency control speed. Collecting machine, electricity, photo, air to integrate and innovative design, manufacture according to national standard strictly. Flexible stroke, modularize station structure, easy operate, high output, low noise and equipped with beautiful out looking. DPB500K is the ideal packing machine. DPB500K main device including PVC heating, blister forming, stroke pulling, punching, transporting, heating & sealing, etc.

### 技术参数Main Technical Parameter

PVC 厚度 PVC thickness	0.15-0.5mm
PVC 宽度 PVC width	330-460mm
纸卡 Card board	200-700g
压缩空气 Air compress	0.55-0.85Mpa
空气耗量 Air consumption	≥0.3 CBM/min
电源 Power supply	380V, 50Hz, 9.5 KW
模具冷却水：自来水或循环水耗能(50L/H) Mold cooling Running water or recycling water(50L/H)	
产能 Capacity	10-25 punches/min
纸板面积 Max. Blister card area	500x(125-220)mm
最大成型面积和深度 Max. Forming area	(310-440)x(120-180)x(16-45)mm(LxWxT)
整机尺寸 Size of machine	3800x900x1650mm
