

GF系列粉碎机组

GF Series Pulverizer Set

► 用途 (Application)

GF系列粉碎机组主要用于化工、医药、食品等行业。本粉碎机组的粉碎机及吸尘器均采用不锈钢材料制成，经工艺加工粉碎机机壳内壁光滑平整能使出粉流畅，便利壳内清洗工作。高速齿盘与活动牙齿经焊接，使得活动牙齿稳定结实。本机符合药品生产的“GMP”要求。

GF series pulverizers are mainly used in chemical, pharmaceutical, food and other industries. The pulverizer and dust collection parts are made of stainless steel with superior technology. The inner smooth parts enables fluent discharging of powder, easy to clean. Well welding between high speed gear and teeth makes the machine durable. The machine conforms to GMP standards.

► 特点 (Features)

本粉碎机组采用垂直下出料设备，使某些流动性较差的料粉碎后出料流畅机内无积粉现象，生产的过程中无粉尘飞扬，且能提高物料的利用率。本机的工作原理是物料进入粉碎室在高速旋转的活动齿盘与固定齿盘受齿的冲击的作用下被粉碎，经筛网筛选后即成为所需的粉料。

The pulverizer set has vertical direct discharging design. This helps material with poor flow ability to discharge freely. There is no accumulated powder inside the pulverizing chamber.Its principle of work is as follows: when raw material entered into the crushing chamber, it is broken under the impacting of movable and fixed gear disks that are rotated in high speed and then becomes the needed raw material through screen.

► 技术参数 (Technical Parameters)

参数ITEM		型号TYPE	GF-20B	GF-30B	GF-40B
主轴转速 Spindle Rotating Speed		rpm	4500	3800	3400
电机功率 Motor Power		kw	4	5.5	7.5
生产能力 Production Capacity		kg/h	60-150	100-300	160-800
进料粒度 Feeding Size		mm	<6	<10	<12
出料细度 Output Size		mesh	20-120	20-120	20-120
外形尺寸 Overall Size		mm	550*600*1250	600*700*1450	800*900*1550
机器净重 Net Weight		kg	250	320	550
