XZS系列振动筛分机
XZS Series Vibration Sifter
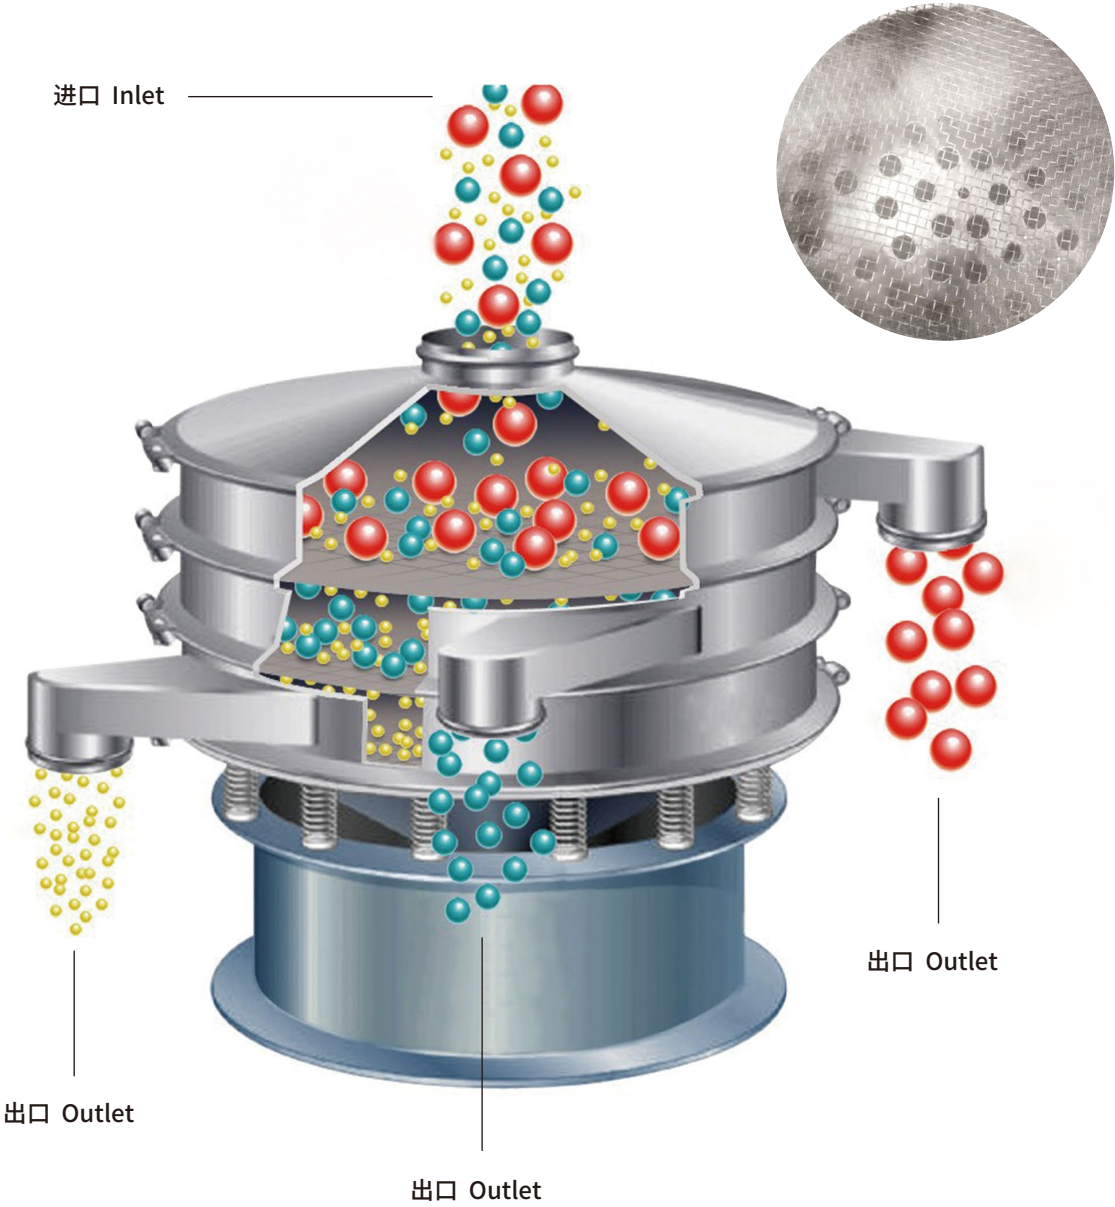

▶ 用途（Application）

XZS振动筛分机适用于食品、医药、化工等行业中颗粒、粉末类物料的筛分、除杂工作。

XZS Vibration Screening Machine is suitable for screening and removing impurities of granular and powder materials in food, medicine, chemical industry, metal metallurgy and other industries.

▶ 特点（Features）

XZS振动筛分机是一款细粉筛分机机械，其噪音低、效率高，颗粒、粉末、粘液在一定范围内均可筛选。分级筛选，可筛一至五层筛网，能同时进行二至六个等级的分选或过滤。设计精巧耐用，操作简单、清洗方便。旋振筛杂质、粗料自动排出，可以连续作业。筛网使用时间长久，换网快，只需3—5分钟。体积小，节省空间，移动方便。

XZS Vibration Screening Machine is a fine powder screening machine with low noise and high efficiency. It can screen particles, powders and mucus within a certain range. It can screen one to five layers of screens for graded screening, and can perform two to six levels of sorting or filtering at the same time. It is exquisitely designed and durable, easy to operate and clean. The rotary vibration sieves automatically discharges impurities and coarse materials, and can operate continuously. The screen has a long service life and is quick to change, which only takes 3-5 minutes. It is small in size, saves space and is easy to move.
