

C&C200C上旋式片剂除粉器

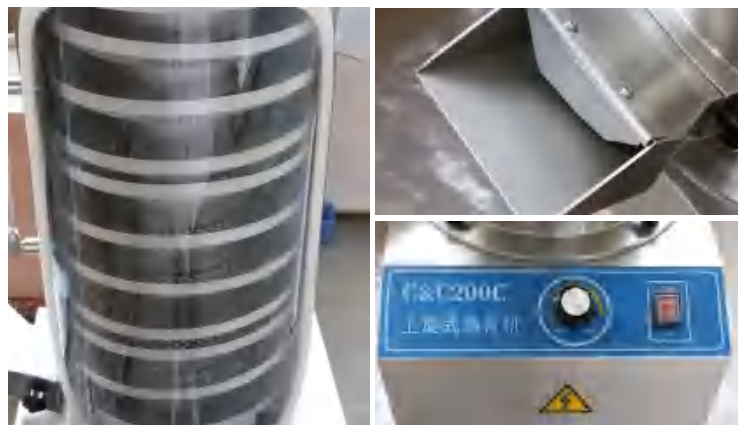

C&C200C Uphill Tablet Deduster

► 介绍 (Introduction)

该机能以超高速同时执行提升和除尘过程，是中等规模生产压片中要求的，适用于制药，化学，食品和其他相关应用。该机可作为多种形状和尺寸的片剂的传送装置、除尘装置，能够去除药片中的灰尘和毛刺。设计和制造符合GMP标准。C&C200C除尘器具有可变的吞吐量功能，并可通过中央吸气管道安全地排放灰尘。

The C&C200C Uphill Tablet Deduster enable to perform both elevating and dedusting process simultaneously at ultra high speed that is highly demanded by medium to mass production tableting scales. It is applicable for pharmaceutical, nutraceutical, chemical, foodstuff and other related applications. Its advantages include long dedusting path, automatic tablet polishing, and high quality dedusting without damage to the tablets. It can act as a delivering device for many shapes and sizes of tablets that need to be dedicated in dedusting. It is designed and manufactured in conformance to GMP standard.

Dust and burrs are removed from the tablets while they are being transported upwards by vibration through a continuous spiral. Additional features of the Uphill Deduster are variable throughput rates, and ready safe exhaust of the dust through a central suction pipe.

► 技术参数 (Technical Parameters)

参数ITEM	型号TYPE	C&C200C
最大产量 Max. Output	-	1,000,000 tablets per hr. (based on 8mm tablets, wt. of 150mg)
额定功率 Rated Power	-	110V, 60Hz, 1Ph, 150W (0.2HP) or 220V/50Hz
除尘距离 Dedusting Distance	-	6.2 m (20.3 ft)
最大片剂直径 Max. Tablet Diameter	mm	ø25
压缩空气 Compressed Air	-	0.1 m3/min (35CFM) - 0.1MPa (15 psi)
真空 Vacuum	-	2.5 m3/min (880CFM) - 0.1MPa (15 psi)
噪音等级 Noise Level	db	<75 db
外形尺寸 Overall Size	mm	500* 550*1500
机器净重 Net Weight	kg	70
