

QVC系列气动真空上料机

QVC Series Pneumatic Vacuum Conveyor

► 介绍 (Introduction)

QVC系列气动真空加料机是一款高效的系统，采用多级喷射泵和金属过滤器，用于输送粉末和颗粒物料。该真空输送机根据良好生产规范（GMP）开发，确保高质量并符合行业标准。它有效解决粉末和颗粒的分层问题，同时消除静电，提供可靠高效的物料输送解决方案。

The QVC Series Vacuum Charging Machine is a highly efficient system designed to convey and transport powder and granular materials using a multi-stage ejector pump and metal filter. This vacuum conveyor is developed in accordance with the Good Manufacturing Practice (GMP) criterion, ensuring high quality and compliance with industry standards. It effectively solves the stratification of powders and granules while eliminating static electricity, providing a reliable and efficient material conveying solution.

► 技术参数 (Technical Parameters)

参数ITEM		型号TYPE	QVC-1	QVC-2	QVC-3	QVC-4	QVC-5	QVC-6
运输能力 Ttransportation Ability	kg/h		350	700	1500	3000	6000	9000
空气压力 Air Pressure	mpa		0.4-0.6	0.4-0.6	0.4-0.6	0.4-0.6	0.4-0.6	0.4-0.6
空气消耗量 Air Consume	l/min		180	360	720	1440	2880	4320
外形尺寸 Overall Size	mm		φ140*560	φ213*720	φ290*850	φ420*1150	φ420*1150	φ420*1350
