

DPB-420平板式软塑泡罩包装机

DPB-420 Flat-plate Soft Plastic Blister Packing Machine

► 用途 (Application)

DPB-420是一款多功能且符合高标准的自动化包装设备，适用于各行业的包装需求。在医疗领域，它可用于包装医疗器械如针头和注射器，确保产品的安全性。在药品行业，DPB-420能有效包装中西药品，维护产品的卫生标准。对于电子行业，它可保护电子元件免受损坏。在化工领域，它确保化工产品包装完整无损。同时，该设备适用于食品行业，保持食品新鲜度和品质。不仅如此，DPB-420也适用于包装敏感性防污染物品，有效保护产品免受外部环境污染的影响。其易操作性、便捷更换模具的特点，使其成为自动化程度较高的机电一体化产品，为不同行业的包装过程提供了便利和高效保障。

DPB-420 is a versatile and high-standard automated packaging equipment suitable for packaging needs in various industries. In the medical field, it can be used to package medical devices such as needles and syringes to ensure the safety of the products. In the pharmaceutical industry, DPB-420 can effectively package Chinese and Western medicines and maintain the hygiene standards of the products. For the electronics industry, it protects electronic components from damage. In the chemical industry, it ensures that the packaging of chemical products is intact. At the same time, the equipment is suitable for the food industry to maintain the freshness and quality of food. Not only that, DPB-420 is also suitable for packaging sensitive anti-pollution items, effectively protecting products from external environmental pollution. Its easy operation and convenient mold replacement make it a highly automated mechatronic product, providing convenience and efficient guarantee for the packaging process of different industries.

► 特点 (Features)

1. 适用于医疗器械、药品、电子元件、化工产品、食品等多种物品的包装。
2. 具有高度自动化程度，能够同步完成多个工序，包括加热、成型、充填、封合、打印批号、裁切等。
3. 产品符合GMP标准，可替代进口同类产品，质量可靠。
4. 可采用PLC可编程控制器和人机界面操作，操作简便。
5. 模具肖钉定位，换模方便，适应不同包装需求。

1. Suitable for packaging of medical devices, medicines, electronic components, chemical products, food and other items.
2. With a high degree of automation, it can complete multiple processes simultaneously, including heating, molding, filling, sealing, printing batch numbers, cutting, etc.
3. The product meets GMP standards and can replace imported similar products with reliable quality.
4. It can be operated by PLC programmable controller and human-machine interface, which is easy to operate.
5. The mold pin is positioned, and the mold change is convenient to meet different packaging needs.

► 技术参数 (Technical Parameters)

参数ITEM	型号TYPE	DPB-420
使用范围 Package Scope	-	Suitable for package of many sensitive anti-pollution materials and medical apparatus and instruments,Chinese and western medicine, electron,chemical product and foodstuff.
生产能力 Production Capacity	-	(1)20 syringe needles/time (2)1ml 11 injectors/time 2.5ml 10 injectors/time,5ml 9 injectors/time,10ml 8 injectors/time
冲裁次数 Packing Frequency		6-16 times /min
包装材料 Package Materials	-	Paper-plastic,Aluminum-plastic,Plastic-plastic and other Compound Film suitableforheat sealing(or the hard plasticless than 0.2mm),width of upper film is 400mm and the lower is 420mm
最大成型内腔尺寸 Maximum inner Dimension	mm	375*154*50
外形尺寸 Overall Size	mm	5000*980*1860
总电源 Total power	kw	10
机器净重 Net Weight	kg	1900
